Attn: Mr. Leonard V. Covello

Dear Sir:

I recently had the opportunity to read an address given by Dr. Theodore Suranyi-Unger, an economist with the Stanford Research Institute, at the 1967 Client Conference held in San Francisco, California on October 16-18, 1967. Dr. Unger's paper "Future Trends and Impact of Government-Sponsored R&D" began with an excellent synopsis of the federal R&D policy-making machinery which I feel would be most useful to future participants in the "Institute for Executives in Scientific Programs." This short paper also considers trends in policy objectives and the environment in which these trends develop. The paper concludes with a brief look at future R&D trends through 1980.

If you wish to review this paper in detail, I presume that Dr. Unger may be able to make a copy of his address available. Dr. Unger is presently at SRI's local offices and may be reached at 524-2053 extension 270.

Yours truly,

/s/
